

Voxel Installation for Joomla! 2.5

Note: The **Bundle** Template is only necessary if the Gantry Library is **NOT** installed at: `/libraries/gantry directory`.

Download Files

Necessary Files

Files required for the template to function:

- **Template (Standalone)** `rt_voxel.zip` - Standalone template file.
- **Template (Bundle)** `rt_voxel-bundle.zip` - Template plus Gantry Component.
- **RokNavMenu** `rt_voxel-extensions.zip` (**unzip first**) or `mod_roknavmenu-j16.zip` - Required for the menu to work.

Additional Files

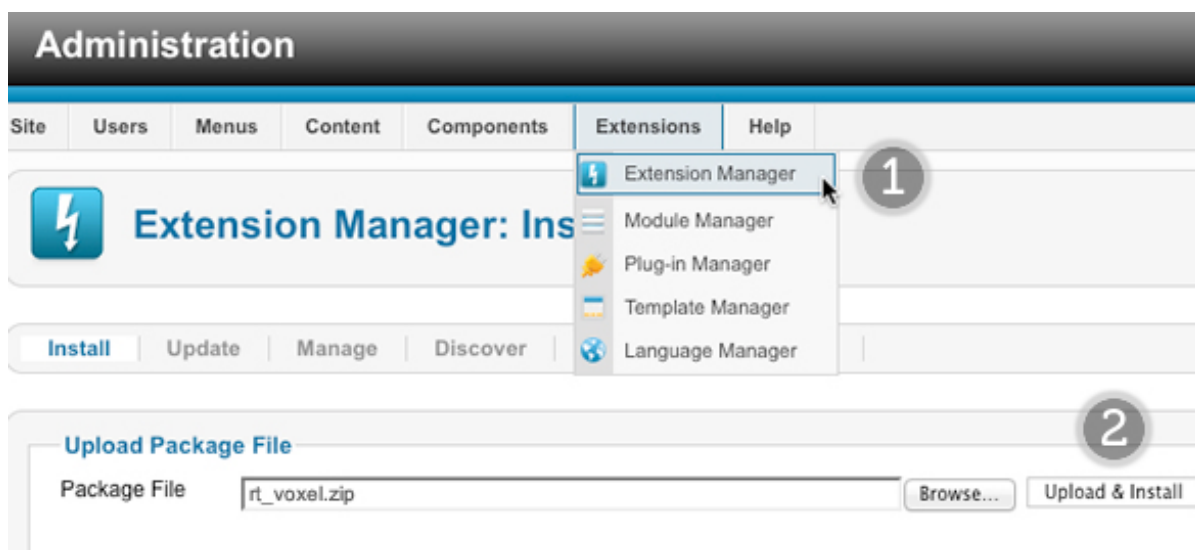

Ancillary files for the template:

- **Source PNG(s)** `rt_voxel-sources.zip` - Adobe® Fireworks PNG source file(s) and any applicable fonts.
- **Extensions** `rt_voxel-extensions.zip` - All extensions for the template.
- **RocketLauncher** `rt_voxel-rocketlauncher.zip` - Demo replica installer.

The latest extensions can be downloaded from the Extensions Download area located [here](#)

Template Installation

Step 1 - Installation

- 1) Install from **Admin** → **Extensions** → **Extensions Manager**
- 2) Browse for **rt_voxel.zip** and click **Upload & Install**

Step 2 - Template Default

The screenshot shows the Joomla! Administration interface. The top navigation bar includes 'Administration' and 'Joomla!' logos. The sidebar has tabs for 'Site', 'Users', 'Menus', 'Content', 'Components', 'Extensions', and 'Help'. The 'Extensions' tab is selected, and the 'Template Manager' is chosen from the sidebar. The main content area displays the 'Template Manager: Styles' page. It features a search bar and a table of templates. The table has columns for 'Style', 'Location', 'Template', 'Default', 'Assigned', and 'ID'. Two templates are listed: 'Bluestork - Default' (ID 2) and 'rt_voxel - Default' (ID 7). The 'rt_voxel - Default' template is selected and marked as 'Master'. A 'Make Default' button is visible next to it.

Style	Location	Template	Default	Assigned	ID
Bluestork - Default	Administrator	Bluestork	★		2
☒ rt_voxel - Default Master	Site	Rt_voxel	★		7

- 1) Make the template default at **Admin** → **Extensions** → **Template Manager**
- 2) Select **rt_voxel**
- 3) Press **Make Default**

RocketLauncher

Note: All sample content images will be replaced with blank versions in the RocketLauncher version.

RocketLauncher is a customized **Joomla** install, that installs a **replica** of the **demo** onto your site - inclusive of sample data, content, extensions, the template and sample images.

Note: We always recommend installing a RocketLauncher first to trial and understand the template more efficiently.

It must be installed as **new**, and **not** over an existing Joomla install.

Step 1 - Upload

- **Download** the RocketLauncher (rt_voxel-rocketlauncher.zip)
- **Unzip** to reveal the rt_voxel-rocketlauncher folder
- **Upload**

Note: You can upload all the files via FTP, or use cPanel or SSH to upload the zip and unzip directly onto the server. Enquire with your hosting provider.

Step 2 - Installation

- Go to www.yoursite.com/rt_voxel-rocketlauncher
- Follow the Installation instructions
- Ensure you click *Install Sample Data* during installation, otherwise your site will be blank
- Delete the **/installation** directory on your server
